

SYPHASPOT CHANDELIER

Syphaspot is a new pendant that enriches Catellani & Smith's range of modular indoor chandeliers. It's a glass sphere pendant that combines the 24V light source from Spot Light with the Syphasfera shade, while maintaining the cables and mounting system of Gold Moon and Jackie O designs. It can be designed for plasterboard ceilings, either as a single pendant with a jack connection or with a fixing disc and wire tensioner.

Alternatively, it can be mounted on satin-finished metal bases with a jack connection.

The proposed starting models use our standard satin-finished steel base, 78 cm in diameter, accommodating 20 / 25 or 35 pendants; it is anyway possible to foresee other bases dimensions and shapes, the same provided for Gold Moon or Jackie O, as well as custom dimensions on request.

Below is a recap of the available standard product codes:

SYFSPLJC - SYPHASPOT - SYPHASFERA WITH SPOT LIGHT 1,2W 24V - WITH JACK - H TOT. 120 cm BLACK WIRE / DRIVER NOT INCLUDED
